

# SG-920T 热风缝口密封机 Hot Air Seam Sealing Machine

## 产品细节 PRODUCT DETAILS

## 产品特点 CHARACTERISTICS

- 采用 PLC 易读，高清晰度的触摸式多功能显示屏，对速度、温度、操作编程作出清晰显示。
- 温度自动控制，稳定性高，温度波动  $\pm 1^{\circ}\text{C}$ ，温度上限报警设计、保护发热管。
- 上下压轮链条同步传动、自动补偿虚位、自动微退功能、减少压带空白。
- 根据人体工学设计双脚踏控制程序，操作舒适，不易疲劳，适宜长时间操作。
- 独特发热管结构，进风经过滤，绝无水分及油分。
- 自动微退功能，可根据需求设定长度，自动送带、剪带、提高产品质量。
- 自动剪带、送带，自动尾带完成，减少材料损耗。
- 加强型曲尺，超大操作空间。
- 下柱独特超薄设计，适宜各种大中小件生产密封压带。
- 根据客户需求可设定长度，自动剪带。
- Adopt PLC easy-to-read, high-definition touch-type multi-function display, make clear display of speed, temperature and operation programming.
- Automatic temperature control, high stability, temperature fluctuation  $\pm 1^{\circ}\text{C}$ , temperature upper limit alarm design, protection of heating tube.
- Synchronous transmission of the upper and lower pressure transmission chain, automatic compensation of virtual position, automatic micro-retraction function, reducing blanking of pressure belt.
- The double foot control program is designed according to human mechanics, which is comfortable to operate, not easy to fatigue, and suitable for long time operation.
- Unique heating tube structure, the inlet air is filtered, no moisture and oil.
- Automatic micro-retraction function, the length can be set according to the requirements, automatic tape feeding, tape cutting, and improve product quality.
- Automatic belt cutting, feeding, and automatic tailing are completed to reduce material loss.
- Enhanced curved ruler, super large operation space.
- The unique ultra-thin design of the lower column is suitable for the production of various types of large, medium and small pieces of sealing pressure belt.
- The length can be set according to customer needs, and the tape is automatically cut.

## 技术参数 TECHNICAL PARAMETERS

产品型号 Model	SG-920T	压缩空气 Compressed air	0.35-0.5Mpa
电源 Power	AC 220V 50/60Hz	上压轮升降距离 Upper pressure wheel lift distance	10-30mm
额定功率 Rated power	2.5KW	外形尺寸 Size	L 1250mm×W 610mm×H 1550mm
速度 Speed	1~20 米/分 m/min	净重 Net weight	115KG
